**WHO WE ARE:** NRF is a dynamic company, made up of a young and motivated work group, whose distinctive feature is the design and production of numerous articles for caravans and campers. Present on the market since 1997, it plays an important role in both the national and global panorama, establishing itself as a reliable supplier for the most qualified companies in the sector.

**OUR WAY OF WORKING:** All our products are designed and manufactured in our factory in Sasso Marconi in the province of Bologna: we are particularly keen on carrying on the tradition of **"handmade"** which represents an important working method in the history of Italian craftsmanship and **"made in Italy"**. In addition to tradition, however, we are aware of the need to embrace new technologies and more sustainable working styles: in fact, NRF adheres to the **"green purchase behaviour"**, that is, encouraging sustainable production and contributing to the protection of natural resources through a "greener" economy: we include the use of recycled (or recyclable) materials, reducing CO2 emissions during production and consequently also pollution in favor of the ecosystem.

**CHI SIAMO:** NRF è un'azienda dinamica, composta da un gruppo di lavoro giovane e motivato, che fa suo segno distintivo la progettazione e la realizzazione di numerosi articoli per caravan e camper. Presente sul mercato dal 1997 ricopre un ruolo rilevante nel panorama sia nazionale che mondiale affermandosi come fornitore affidabile per le aziende più qualificate del settore.

**IL NOSTRO MODO DI LAVORARE:** Tutti i nostri prodotti sono pensati e realizzati nel nostro stabilimento di Sasso Marconi in provincia di Bologna: teniamo particolarmente a portare avanti la tradizione del **"fatto a mano"** che rappresenta un metodo di lavoro importante nella storia dell'artigianato italiano e del **"made in Italy"**. Oltre alla tradizione, però, siamo coscienti della necessità di abbracciare nuove tecnologie e stili di lavoro più sostenibili: infatti NRF aderisce al **"green purchase behaviour"**, ovvero incentivare la produzione sostenibile e contribuire alla tutela delle risorse naturali attraverso un'economia più "green": includiamo l'uso di materiali riciclati (o riciclabili), riducendo le emissioni di CO2 durante la produzione e di conseguenza anche l'inquinamento a favore dell'ecosistema.

**QUI SOMMES-NOUS :** NRF est une entreprise dynamique, composée d'un groupe de travail jeune et motivé, dont la particularité est la conception et la production de nombreux articles pour caravanes et camping-cars. Présent sur le marché depuis 1997, il joue un rôle important dans le panorama national et mondial, s'affirmant comme un fournisseur fiable pour les entreprises les plus qualifiées du secteur.

**NOTRE FAÇON DE TRAVAILLER :** Tous nos produits sont conçus et fabriqués dans notre usine de Sasso Marconi dans la province de Bologne : nous tenons particulièrement à perpétuer la tradition du **"fait main"** qui représente une méthode de travail importante dans l'histoire de l'artisanat italien et du **"made in Italy"**. Mais au-delà de la tradition, nous sommes conscients de la nécessité d'adopter de nouvelles technologies et des styles de travail plus durables : en effet, NRF adhère au **"green purchase behaviour"**, c'est-à-dire en encourageant la production durable et en contribuant à la protection des ressources naturelles à travers une économie plus « verte » : nous incluons l'utilisation de matériaux recyclés (ou recyclables), réduisant les émissions de CO2 pendant la production et par conséquent aussi la pollution en faveur de l'écosystème.

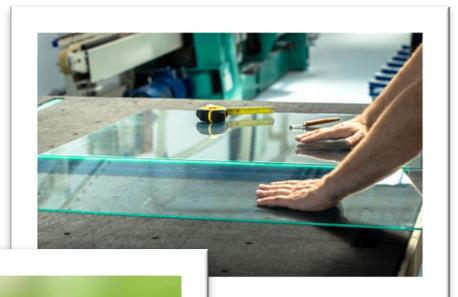

**WER WIR SIND:** NRF ist ein dynamisches Unternehmen, bestehend aus einer jungen und motivierten Arbeitsgruppe, dessen Besonderheit die Entwicklung und Produktion zahlreicher Artikel für Caravans und Wohnmobile ist. Das Unternehmen ist seit 1997 auf dem Markt und spielt sowohl auf nationaler als auch auf globaler Ebene eine wichtige Rolle. Es hat sich als zuverlässiger Lieferant für die qualifiziertesten Unternehmen der Branche etabliert.

**UNSERE ARBEITSWEISE:** Alle unsere Produkte werden in unserer Fabrik in Sasso Marconi in der Provinz Bologna entworfen und hergestellt: Wir legen besonderen Wert darauf, die Tradition der **"Handarbeit"** fortzuführen, die eine wichtige Arbeitsmethode in der Geschichte des italienischen Handwerks und des **"Made in Italy"** darstellt. Neben der Tradition sind wir uns jedoch der Notwendigkeit bewusst, neue Technologien und nachhaltigere Arbeitsstile zu übernehmen: NRF hält sich an das **"green purchase behaviour"**, d. h. wir fördern eine nachhaltige Produktion und tragen durch eine „grünere“ Wirtschaft zum Schutz der natürlichen Ressourcen bei: Wir schließen die Verwendung von recycelten (oder recycelbaren) Materialien ein, reduzieren die CO2-Emissionen während der Produktion und somit auch die Umweltverschmutzung zum Wohle des Ökosystems.

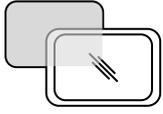

**QUIENES SOMOS:** NRF es una empresa dinámica, formada por un grupo de trabajo joven y motivado, cuya característica distintiva es el diseño y producción de numerosos artículos para caravanas y autocaravanas. Presente en el mercado desde 1997, juega un papel importante en el panorama nacional y mundial, consolidándose como un proveedor confiable para las empresas más calificadas del sector.

**NUESTRA FORMA DE TRABAJAR:** Todos nuestros productos están diseñados y fabricados en nuestra fábrica de Sasso Marconi en la provincia de Bolonia: estamos particularmente interesados en continuar la tradición del **"hecho a mano"**, que representa un método de trabajo importante en la historia de la artesanía italiana y del **"made in Italy"**. Además de la tradición, sin embargo, somos conscientes de la necesidad de adoptar nuevas tecnologías y estilos de trabajo más sostenibles: de hecho, NRF se adhiere al **"green purchase behaviour"**, es decir, fomentando la producción sostenible y contribuyendo a la protección de los recursos naturales a través de una economía "más verde": incluimos el uso de materiales reciclados (o reciclables), reduciendo las emisiones de CO2 durante la producción y, en consecuencia, también la contaminación en favor del ecosistema.

SOLAR RADIATION **REFLECTIVE MATERIAL** 

**INSULATING MATERIAL** AGAINST COLD AND HEAT 

AVAILABLE IN **GREY COLOR** 

CLOSURE WITH **ZIPPER** 

**VELCRO FELT** INCLUDED 

PACKAGED IN A **PRACTICAL BLUE TNT BAG** 

# SEITZ WINDOWS INTERNAL BLIND

 Made with seven-layer quilted material, the protectors are applied with tear-proof suction cups directly to the glass. When mounted it does not constitute an obstacle either to the opening of the window or to the normal use of the mosquito net. These innovative protections will retain the heat inside the vehicle in winter and in summer, thanks to the reflective film and the possibility of opening the window without having to move them, they will always keep your camper cool. Available custom-made for all Seitz windows on the market.

 Realizzate con materiale trapuntato a sette strati, le protezioni si applicano con ventose anti strappo direttamente sul vetro. Quando è montato non costituisce un ostacolo né all'apertura della finestra né al normale utilizzo dell'oscurante zanzariera. Queste innovative protezioni in inverno tratterranno il caldo all'interno del veicolo e in estate grazie alla pellicola riflettente e alla possibilità di aprire la finestra senza doverle spostare manterranno il vostro camper sempre fresco. Disponibili a misura per tutte le finestre Seitz in commercio.

 Fabriqués avec un matériau matelassé à sept couches, les protecteurs sont appliqués avec des ventouses indéchirables directement sur le verre. Une fois montée, elle ne constitue un obstacle ni à l'ouverture de la fenêtre ni à l'utilisation normale de la moustiquaire. Ces protections innovantes retiendront la chaleur à l'intérieur du véhicule en hiver et en été, grâce au film réfléchissant et à la possibilité d'ouvrir la fenêtre sans avoir à les déplacer, elles garderont toujours votre camping-car au frais. Disponible sur mesure pour toutes les fenêtres Seitz du marché.

 Die aus siebenlagigem Steppmaterial gefertigten Protpektoren werden mit reißfesten Saugnäpfen direkt auf dem Glas angebracht. Im montierten Zustand stellt es weder ein Hindernis für das Öffnen des Fensters noch für die normale Nutzung des Moskitonetzes dar. Diese innovativen Schutzvorrichtungen halten im Winter und im Sommer die Wärme im Inneren des Fahrzeugs. Dank der reflektierenden Folie und der Möglichkeit, das Fenster zu öffnen, ohne sie bewegen zu müssen, bleibt Ihr Wohnmobil immer kühl. Als Maßanfertigung für alle Seitz-Fenster auf dem Markt erhältlich.

 Fabricados con material acolchado de siete capas, los protectores se aplican con ventosas resistentes a roturas directamente sobre el cristal. Montado no constituye un obstáculo ni para la apertura de la ventana ni para el uso normal de la mosquitera. Estas innovadoras protecciones retendrán el calor en el interior del vehículo en invierno y en verano, gracias a la película reflectante y a la posibilidad de abrir las ventanillas sin tener que moverlas, mantendrán tu camper siempre fresca. Disponibles a medida para todas las ventanas Seitz del mercado.

 This is a concept that goes well beyond the simple use of recyclable materials: "green" products are essential to promote a sustainable economy and conscious consumption, reducing the negative impact on the environment. With this new product, NRF adheres to the "green purchase behaviour", that is, encouraging sustainable production and contributing to the protection of natural resources through a "greener" economy: **we include the use of recycled (or recyclable) materials, reducing CO2 emissions during production and consequently also pollution in favor of the ecosystem.**

 Si tratta di un concetto che va ben oltre il semplice utilizzo di materiali riciclabili: i prodotti "green" sono essenziali per promuovere un'economia sostenibile e un consumo consapevole, riducendo l'impatto negativo sull'ambiente. Con questo nuovo prodotto, NRF aderisce al "green purchase behavior", ovvero incoraggiare una produzione sostenibile e contribuire alla salvaguardia delle risorse naturali attraverso un'economia più "green": **includiamo l'utilizzo di materiali riciclati (o riciclabili), riducendo le emissioni di CO2 durante la produzione e di conseguenza anche l'inquinamento a favore dell'ecosistema.**

 Ce concept va bien au-delà de la simple utilisation de matériaux recyclables : les produits "green" sont essentiels pour promouvoir une économie durable et une consommation responsable, réduisant ainsi l'impact négatif sur l'environnement. Avec ce nouveau produit, NRF adhère au "green purchase behavior", c'est-à-dire encourage la production durable et contribue à la protection des ressources naturelles grâce à une économie plus "green": **nous incluons l'utilisation de matériaux recyclés (ou recyclables), réduisant ainsi les émissions de CO2 lors de la production et, par conséquent, la pollution, au bénéfice de l'écosystème.**

 Dieses Konzept geht weit über die bloße Verwendung recycelbarer Materialien hinaus: "green" Produkte sind unerlässlich, um eine nachhaltige Wirtschaft und bewussten Konsum zu fördern und so die negativen Auswirkungen auf die Umwelt zu reduzieren. Mit diesem neuen Produkt folgt NRF dem "green purchase behavior", d. h. wir fördern eine nachhaltige Produktion und tragen durch eine "green" Wirtschaft zum Schutz natürlicher Ressourcen bei: **Wir verwenden recycelte (oder recycelbare) Materialien, reduzieren die CO2-Emissionen während der Produktion und damit auch die Umweltverschmutzung zum Wohle des Ökosystems.**

 Este concepto va mucho más allá del simple uso de materiales reciclables: los productos "green" son esenciales para promover una economía sostenible y un consumo responsable, reduciendo el impacto negativo en el medio ambiente. Con este nuevo producto, NRF se adhiere al principio de "green purchase behavior" es decir, fomenta la producción sostenible y contribuye a la protección de los recursos naturales mediante una economía más "green": **incluimos el uso de materiales reciclados (o reciclables), lo que reduce las emisiones de CO2 durante la producción y, en consecuencia, la contaminación, en beneficio del ecosistema.**

# ACCESSORIES FOR INTERNAL BLIND: "KIT DO IT YOURSELF"

## USEFUL PRODUCT INFORMATION

7 -LAYER MATERIAL

SOLAR RADIATION REFLECTIVE MATERIAL

INSULATING MATERIAL AGAINST COLD AND HEAT

AVAILABLE IN GRAY COLOR

### INSTRUCTIONS FOR USE:

Use the sheet to prepare a template for windshield and side windows. Mark the eyelets position. Put the template on the insulating material and cut it. Hem the insulating material using the hem material. Fix eyelets where desired and insert suction cups.

### ISTRUZIONI D'USO:

Usate il foglio per realizzare una dima per il parabrezza e i finestrini laterali. Segnate la posizione degli occhielli. Ponete la dima sul materiale isolante e ritagliatelo. Bordate il materiale isolante usando il materiale per bordare. Fissate gli occhielli dove desiderate e inseritevi le ventose.

### MODE D'EMPLOI:

Utilisez la feuille pour créer un modèle pour le pare-brise et les vitres latérales. Marquez la position des œillets. Placez le gabarit sur le matériau isolant et découpez-le. Bordez le matériau isolant à l'aide d'un matériau de bordure. Fixez les œillets où vous le souhaitez et insérez les ventouses.

### GEBRAUCHSANWEISUNG:

Erstellen Sie mit dem Blatt eine Schablone für die Windschutzscheibe und die Seitenfenster. Markieren Sie die Position der Ösen. Legen Sie die Schablone auf den Dämmstoff und schneiden Sie diese aus. Kanten Sie den Dämmstoff mit Kantenmaterial ein. Befestigen Sie die Ösen an den gewünschten Stellen und setzen Sie die Saugnäpfe ein.

### INSTRUCCIONES DE USO:

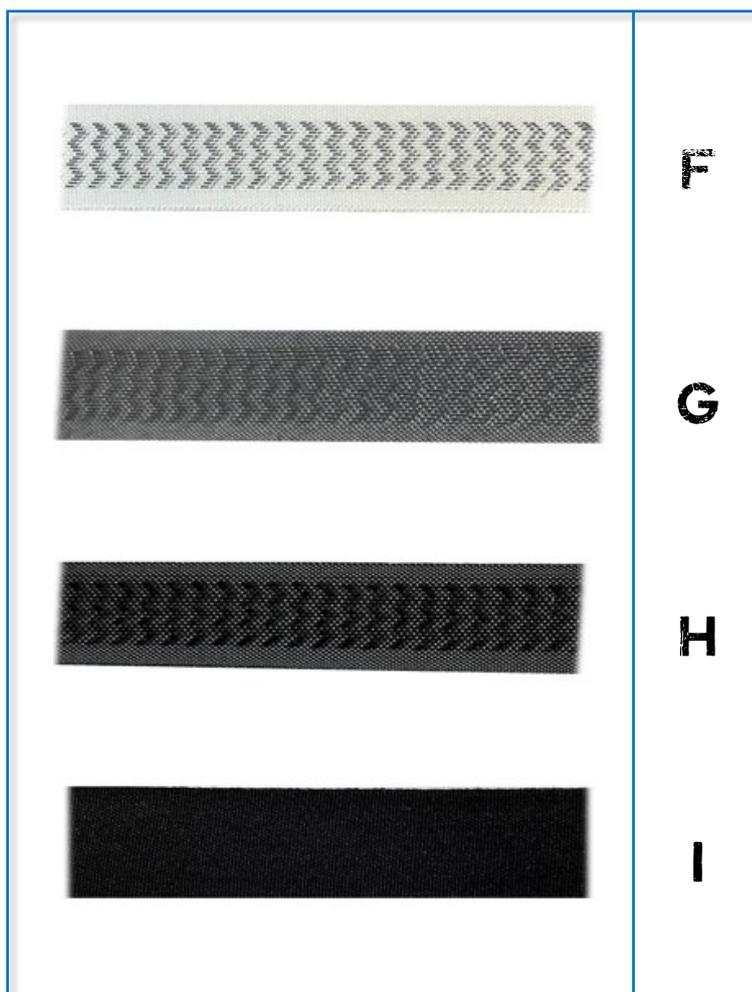

Utilice la hoja para hacer una plantilla para el parabrisas y las ventanas laterales. Marcar la posición de los ojalos. Coloque la plantilla sobre el material aislante y recórtela. Bordee el material aislante utilizando material de borde. Fije los ojalos donde desee e inserte las ventosas.

# SEITZ WINDOWS EXTERNAL BLIND

 They are made with a three-layer coupled material PVC + foam + PVC, and are very easy to apply because they have two elastic bands in the lower part of the glass and a click-clack closure in the upper part. When mounted, it does not constitute an obstacle to the opening and closing of the window. For correct conservation, it is advisable to apply it only during the period of use of the camper. The use of these protections will give several advantages as they protect the glass from the elements and retain more heat inside the vehicle during the winter period. Available in size for all Seitz windows on the market.

 Sono realizzati con materiale accoppiato a tre strati PVC + espanso + PVC, e si applicano molto facilmente perché hanno due elastici nella parte inferiore del vetro ed una chiusura click-clack nella parte superiore. Quando è montato non costituisce un ostacolo all'apertura e chiusura della finestra. Per una corretta conservazione è consigliabile applicarlo solo durante il periodo di utilizzo del camper. L'uso di queste protezioni darà diversi vantaggi in quanto proteggono il vetro dalle intemperie e trattengono maggiormente il calore all'interno del veicolo durante il periodo invernale. Disponibili a misura per tutte le finestre Seitz in commercio.

 Ils sont fabriqués avec un matériau couplé à trois couches PVC + mousse + PVC, et sont très faciles à appliquer car ils disposent de deux bandes élastiques dans la partie inférieure du verre et d'une fermeture clic-clac dans la partie supérieure. Une fois monté, il ne constitue pas un obstacle à l'ouverture et à la fermeture de la fenêtre. Pour une conservation correcte, il est conseillé de l'appliquer uniquement pendant la période d'utilisation du camping-car. L'utilisation de ces protections offrira plusieurs avantages puisqu'elles protègent le verre des intempéries et retiennent plus de chaleur à l'intérieur du véhicule pendant la période hivernale. Disponible dans des dimensions personnalisées pour toutes les fenêtres Seitz du marché.

 Sie bestehen aus einem dreischichtigen Verbundmaterial (PVC + Schaum + PVC) und sind sehr einfach anzubringen, da sie im unteren Teil des Glases über zwei Gummibänder und im oberen Teil über einen Klick-Klack-Verschluss verfügen. Im montierten Zustand stellt es kein Hindernis beim Öffnen und Schließen des Fensters dar. Für eine ordnungsgemäße Konservierung empfiehlt es sich, das Produkt nur während der Nutzungsdauer des Wohnmobils anzuwenden. Die Verwendung dieser Schutzvorrichtungen bietet mehrere Vorteile, da sie das Glas vor Witterungseinflüssen schützen und im Winter mehr Wärme im Fahrzeuginneren halten. Erhältlich in individuellen Größen für alle Seitz-Fenster auf dem Markt.

 Están fabricados con un material acoplado trícapa PVC + espuma + PVC, y son muy fáciles de aplicar ya que disponen de dos bandas elásticas en la parte inferior del cristal y un cierre click-clack en la parte superior. Una vez montado no constituye un obstáculo para la apertura y cierre de la ventana. Para una correcta conservación es aconsejable aplicarlo únicamente durante el periodo de uso de la autocaravana. El uso de estos protectores brindará varias ventajas ya que protegen el vidrio de los elementos y retienen más calor dentro del vehículo durante el periodo invernal. Disponible en tamaños personalizados para todas las ventanas Seitz del mercado.
